

In-Country Health Information Form

University of Missouri-Kansas City: International Academic Programs

Email to International Academic Programs international@umkc.edu two weeks prior to departure

As described on page 3 [GeoBlue](#), (formerly HTH), is the provider of the Study Abroad Health Insurance policy that most UMKC international travel participants are required to carry. International students use the ISAO required insurance.

In addition, [UHC Global](#) and [AIG WorldSource](#), also identified on page 3, provide additional services such as evacuation and identification of in-country assistance.

Country Specific Health Information (for each location)

Please reference the Centers for Disease Control and Prevention website: www.cdc.gov for country specific health information. You should not give specific medical advice to participants, but instead refer them to the CDC Travelers Health Information, Health Services, or a Physician. Location specific health concerns may indicate suggested or required immunization, or particular precautions suitable to the situation.

Serious Participant Health Concerns and Preparation

Be aware of and prepare for participants who self-identify potentially life threatening or disabling health issues (food allergies, asthma, diabetes, mobility issues, mental illness, etc.) or other areas of concern. A candid conversation between you and the participant prior to departure can positively impact the experience for everyone involved.

Participant Name:

Health Concern: _____

In-country resources: _____

Participant Name: _____

Health Concern: _____

In-country resources: _____

Participant Name: _____

Health Concern: _____

In-country resources: _____

Location 1 Health Provider Information

Obtain information from [GeoBlue](#) insurance resources. Note: even though you and others may be fluent in the language of the host country, it may not always be possible or ethical to be with an injured or ill participant in a medical facility. It is very important to have the names of English speaking health providers in-country.
